Self Employed

1995- 2020 Founded Inspired Mosaics Studio. This involved working to commission for public and private clients along with independent course programmes and school projects. Along with managing a small business it required the development of creative and technical skills as a maker to deliver a service which has often over fulfilled clients expectations. Also as a contributing member of the mosaic community it has been important to continually develop as an artist by producing work for exhibition.

School Commissions

1995 - 2018 As part of Inspired Mosaics Studio I offered a school mosaic commission service for primary, secondary and special needs schools. My role was to help the children design and make a large scale architectural mosaic work which was then installed by my team. The result: shared creative intentions, engaging and developing of skills and producing a legacy artwork for the school.
